

Acordis Technology & Solutions is Now Certified in Cisco ISE

Miami, Florida – *Acordis a leading IT consulting firm headquartered in Miramar, Florida, has recently added Cisco ISE to its portfolio as their new offering; recently becoming certified in Cisco's latest software offering.*

Cisco Identity Services Engine (ISE) is a consolidated next-generation identity and access control policy platform that enables companies to enforce, improve infrastructure security, and optimize their service operations. Cisco ISE's unique architecture enables companies to collect real-time contextual information from networks, users, and devices. Cisco ISE incorporates a superset of features available in the existing Cisco policy platforms, which enable you to manage your entire access network. The Cisco ISE solution offers context-aware identity management. You can deploy Cisco ISE across an enterprise infrastructure, supporting 802.1X wired, wireless, and Virtual Private Networks (VPNs).

The Cisco ISE Architecture backs both standalone and distributed deployments (also known as "high availability" or "redundant") in which one machine assumes the primary role and another "backup" machine assumes the secondary role. Cisco ISE allows for an extensive range of variables within authorization policies to ensure that only authorized operators can access the appropriate resources when they access the network. Cisco ISE enables validation and maintenance of security capabilities on any client machine that accesses the protection network to ensure that the imposed network security measures remain relevant and effective.

So, to know more about Cisco Identity Services Engine (ISE), contact Acordis Technology & Solutions at 954-620-0072 or mail your queries to sales@acordiscorp.com.

YOUR TECHNOLOGY PARTNER
