

Director of Information Technology (IT)

Acordis International is one of the fastest growing IT companies in the United States and poised for explosive growth. As a premier Cisco Partner, we offer an extensive portfolio of Cisco services and technologies that span the following areas: unified communications and collaboration, networking, data center, security, and cloud-based solutions. Acordis provides infrastructure and technology services and solutions to clients throughout Florida and the United States. Through our partnership and certifications with leading technology providers including Cisco, Microsoft, Barracuda, VM Ware, Citrix, Xerox, Dell, Arista, Quantum, HP, Samsung, and many others. Our customers receive the highest quality products and services the industry has to offer.

Position Overview:

As a Director of Information Technology, you will report to Chief technology officer and lead the Data Center/Hosting, Infrastructure Architecture, Design, implement, manage existing clients, and sell new solutions.

You will work with fast-paced, skilled team of infrastructure engineers and sales teams across multiple high-profile prospects, and projects, responsible for start to finish of the infrastructure projects. Much of your success in this role is dependent upon timely, clear, concise, and effective verbal and written communication along with visiting prospects, clients to sell technology and solutions offered by Acordis.

Key Responsibilities:

- Visiting clients, and prospects to qualify, design and sell new solutions.
- Oversee advanced administration, maintenance, setup, configuration, and troubleshooting of the SAN, servers, network equipment and monitoring systems.
- Provide technical leadership in design, architecture and administration through identifying problem areas and upholding product quality.
- Oversee and coordinate IT wide Disaster Recovery planning and testing exercises
- Monitoring projects on an ongoing basis, evaluating progress, quality, managing issue resolution as necessary.
- Managing risks, assessing gaps/opportunities, and implementing action plans to mitigate risks, when applicable.

YOUR TECHNOLOGY PARTNER

- Promoting effective teamwork.
- Dealing effectively and independently with critical conversation.
- Responsible for communicating project status to technology management, sponsors, and vendors, as appropriate.
- Developing, supporting, and communicating system engineering policies, standards, guidelines and procedures.
- Delivering highly complex projects using in-depth knowledge within the Infrastructure and Operations domain.
- Recommend, implement and enforce policies and procedures to improve the performance, scalability, and security of the infrastructure.

We are seeking candidates with hands on experience with the following:

- Bachelor's Degree in an IT related field and a minimum of 5 years of experience leading Infrastructure & Operations, Data Center, Security domains teams. Must have in-depth hands-on Cisco, VM, Microsoft and manage services experience to handle clients and deployment in real world.

Required Experience:

- 5 -10 Years of deep experience with Infrastructure Engineering.
- 3- 5 Years of hands-on architecture and design expertise with Active/Active DC, SAN, Network(Cisco), VMware, Windows, Firewall and others.
- Experience developing long-term strategies and influencing leadership decisions
- Must have strong engineering and troubleshooting skills in a 24/7 environment
- Must have strong knowledge in MPLS, TCP/IP, DNS, SMTP, DHCP, Active Directory, VPN, and Backup administration
- Proven track record leading Data Center consolidation, upgrade and DR projects
- Familiarity with IT Security, Release, Config and Change Management
- Experience with Public & Private cloud setup and IT Automation
- Strong knowledgeable on current Data Center related technologies in a highly available environment
- Strong written and verbal communication skills
- Ability to manage competing priorities

YOUR TECHNOLOGY PARTNER

- High organization and planning skills
- Ability to self-start and be versatile in a dynamic environment
- CCNP, PMP and ITIL certifications are highly desired.

Acordis is an Equal Employment Opportunity Employer.
