

CASE STUDY

MANAGED IT PROFESSIONAL SERVICES

HEALTHCARE SECTOR
MANUFACTURING

OVERVIEW

Client: **Arnet Pharmaceuticals**
Industry: **Manufacturing**
Location: **Davie, FL.**

Challenge:

The client needed to upgrade their IT infrastructure, including its storage environment, backup solutions, and network to keep up with its growth and move toward a modern and scalable IT infrastructure.

Recommendation:

- Nimble all-flash storage array for the client storage environment.
- Barracuda networks for client backup needs.
- Meraki gear for firewall, switches, and Wi-Fi access points.

Summary:

Due to the successful implementation of our recommendation, the client also signed a managed services agreement. The Meraki gear allowed us to effectively manage their entire network and provided us with detailed analytics that we use to continually improve network security and the client experience.

RESULTS

Benefits One

The Nimble (HPE) solution improved the speed of data access and application performed.

Benefits Two

Barracuda backup was instrumental in allowing the client to recover from a Ransomware attack.

Benefits Three

Network upgrades eliminated network downtime, increased performance across the network and added various layers of security that were not previously present within the client environment.

AT A GLANCE

CHALLENGES

- Antiquated IT Infrastructure
- Inefficient Storage Environment
- Non-existent Backup System

BENEFITS

- Scalable & Modern Technology
- Increase Speed in Data Access
- Backup/Recovery Solution
- Mitigate Ransomware Attack
- Eliminated Network Downtime
- Increased Network Performance

Technologies Utilized

- Nimble HPE
- Meraki
- Barracuda

Resource Structure

- On-Site PM
- On-Site Technicians
- Dedicated Account Manager
